

Rare Plants of Louisiana

Chasmanthium ornithorhynchum - bird-bill spikegrass Grass Family (Poaceae)

Rarity Rank: S2/G4

	1	2	3	4	5
State					
Global					
	imperiled		rare		secure

Range: AL, FL, LA, MS

Recognition:

- A rhizomatous grass, 30 to 50 cm tall with erect to reclining stems
- Short contracted panicle with sessile to short-pedicellate, somewhat feathered spikelets.
- Spikelets 7 to 18 mm long by 8 to 17 mm wide, laterally flattened with 5 to 7 florets

Flowering Time: June to October

Light Requirement: Shade – part shade

Wetland Indicator Status:

FACW – usually in wetlands

Habitat:

Bayhead swamps and margins of bayheads and wet longleaf pine flatwoods.

Threats:

- Conversion of habitat (pine flatwoods) to other vegetation types
- Hydrological modification by ditching/dredging of streams in bayhead swamps and bedding of pine flatwoods

Beneficial Management Practices:

- Protect flatwoods streams from dredging/ditching
- Incorporate heavier thinning (during very dry periods) and regular burning in management of pine flatwoods
- Allow fires to burn into bayhead swamps rather than placing fire lines at the junction of pine flatwoods and bayhead swamps

LA River Basins: Pearl, Pontchartrain

Rare Plants of Louisiana

Left: Herbarium sheet of *Chasmanthium ornithorhynchum*.

Below: *C. ornithorhynchum* spikelets showing strong lateral compression. From the appearance of the spikelets, one can see the resemblance to bird's bills.
